

GUJARAT TECHNOLOGICAL UNIVERSITY

Master of Engineering Power Electronics

Subject Code: 3722916

Semester – II

Subject Name: Power Converters: Modelling and Analysis

Type of course: Core IV

Prerequisite: Power Electronics Converters

Rationale:

The courses in power electronics at undergraduate level generally introduce the preliminary circuits, their steady state analysis, operation and applications. Hence, the course is included to provide the exposure to modeling, analysis, control and design aspects of switched mode power electronic circuits.

Teaching and Examination Scheme:

Teaching Scheme			Credits C	Examination Marks				Total Marks
L	T	P		Theory Marks		Practical Marks		
			ESE (E)	PA (M)	ESE (V)	PA (I)		
3	0	2	4	70	30	30	20	150

Content:

Sr. No.	Content	Total Hrs
1	Review of the ideal switch; basic switch cell; basic topology rules; basic converter topologies; steady-state analysis; dc transformer model, construction of equivalent circuit model, Voltage gain and Efficiency	5
2	AC Equivalent Circuit Modeling Basic AC modeling approach; State-space Averaging; Circuit Averaging and Average Switched Model; The Canonical Circuit Model; Modeling of PWM Modulator; Some examples	9
3	Converter Transfer Functions Review of Bode Plots; Analysis of converter transfer functions; Graphical construction of impedances and transfer functions; Graphical construction of Converter transfer functions, Measurement of AC transfer functions and impedances	9
4	Controller Design Introduction; Effect of negative feedback on the network transfer functions; Closed loop transfer functions; Stability; Regulator Design : PI, PD and PID compensators; Measurement of loop gains	9
5	Input Filter Design EMI and filter design problem; Effect of input filter on converter transfer functions; Design of Damped input filter; Examples	5

GUJARAT TECHNOLOGICAL UNIVERSITY

Master of Engineering Power Electronics

Subject Code: 3722916

6	AC and DC equivalent circuit modeling of the discontinuous conduction mode Analysis for DCM for basic DC-DC converters, DCM averaged switched model; Small-signal AC modeling of the DCM switch network; High frequency dynamics of converters in DCM	5
---	---	---

Course Outcomes:

Sr. No.	CO statement	Marks % weightage
CO-1	To analyse power electronic converters.	20
CO-2	To analyse AC equivalent circuit modeling of power electronic converters.	20
CO-3	To understand the concept of controller design for power electronic converters	20
CO-4	To analyse and design the filter circuit.	20
CO-5	To analyse AC and DC equivalent circuit modeling of DC to DC converter.	20

List of Experiments:

Lab experiments shall target the modeling of various switched mode power electronic converters and hence, simulation of these converters using these models to study their steady state and dynamic response.

GUJARAT TECHNOLOGICAL UNIVERSITY

Master of Engineering Power Electronics Subject Code: 3722916

Experiments related to design of filters and their effect on transfer function and response shall also be included.

Major Equipment:

Simulation software like MATLAB, PSIM or Scilab and Power Electronic Converters as demanded by the course.
